

# MAINTENANCE

ACEI's core value is team spirit, making companionship a complementary tool to disseminating good practices and improving everyone's knowledge

- Intervention on any kind of laboratory and industrial equipment
- From curative maintenance to entire management of your equipment, according to your needs
- Our technicians are trained directly by manufacturers on a broad range of equipment
- Training and specific authorization for operations abroad (Electrical B2/BR empowerments, GSI2, ARI/MAF, BOSIET/OPITO)

## CURATIVE AND PREVENTIVE INTERVENTION

Our interventions are done directly on site in order to:

- limit production shutdown
- avoid moving material and damage during transportation

### ON PREVENTIVE MAINTENANCE

- checking of wear parts
- checking of safety components
- replacement of consumables
- cleaning, lubrication
- test run

### ON CURATIVE MAINTENANCE

- securing, ensuring compliance
- troubleshooting
- cause analysis
- repairs

**OUR INTERVENTION RANGES**

PRESSURE / TEMPERATURE / ROTATION  
 SPEED / DISPLACEMENT / STRENGTH  
 DEBIT / VOLUME / WEIGHING  
 SONIC / ACOUSTIC

Quick intervention thanks to the expertise and multidisciplinary of our technicians

### PETROPHYSICAL EXPERTISE

- Reservoir wellbore interface
- Geomechanics (cell, press, instrumentation, UCS, MultiTriax, complex test with sonic, acoustic testing, micro-indentation, scratch test...)
- Fluids and cements (SGSA, HPHT rheometer, fluid loss, HPHT consistometer...)
- Activities linked to coring samples storage: trim saw, core drill, slabbing saw...
- PVT (QuadPocket, Saphyre Cell...)
- Chromatography
- Vacuum pump

## TECHNICAL ASSISTANCE

- Equipment management with provision of:

**Follow-up of operation/defects**  
(planned according to your needs)

**Inventory management**  
(map, parts criticality, availability...)

**Control charts**

- Technical assistance:

- **suppliers interface for purchasing specific and common parts (cost optimisation)**
- **support for requirements specification redaction**

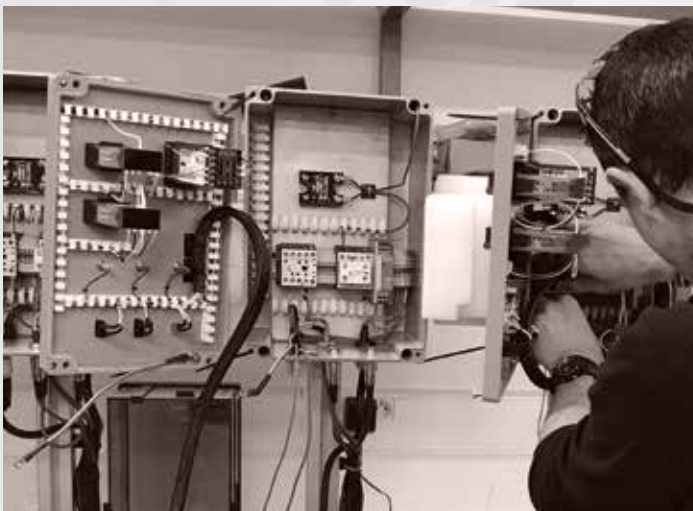

- Training for use and maintenance is carried out by our technicians after optimisation and commissioning (description of the working and tests with your teams)

- We can also provide training for:

- **regulation devices**
- **pressure equipment**
- **user safety**

Our team can also:

- handle upgrade maintenance operations (for process, regulation parameters, measuring systems or equipment)
- interface with our specialised suppliers network

PLEASE CONTACT US FOR ANY EQUIPMENT TRAINING NEEDS

ACEI is ISO9001 certified
